

BPI# 9600

BPI® LENS HOLDER II™

The original and most popular. Used by more than 40,000 labs. Holds two lenses. Stainless steel and heat resistant plastic. Only BPI's unique torsion bar design prevents lens warping, scratching, and bending of the lenses while tinting.

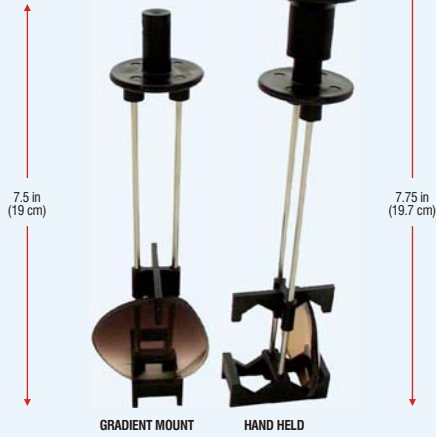

UNIQUE TORSION BAR DESIGN

As the adjustable clamp moves up and down the stainless steel guides, the torsion bars flex to keep the clamp and the lenses firmly in place and eliminate slippage.

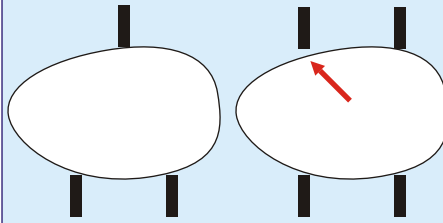

No pressure is exerted on the lens!

BPI# 9603

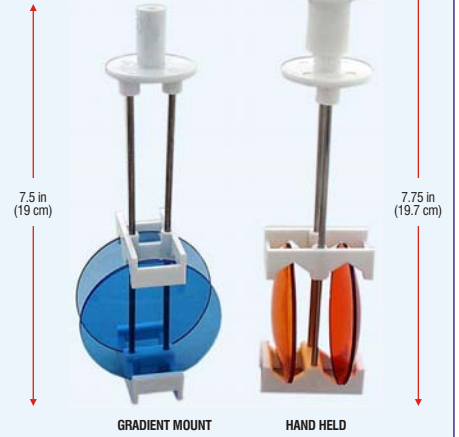

BPI® 3 POINT LENS HOLDER II™

Perfect for lenses of unusual shapes. The BPI® Three Point Lens Holder II™ holds two lenses. It is made from stainless steel and heat resistant plastic. The upper clamp has one point of contact with the lens.

3 POINTS OF CONTACT CAN BE BETTER THAN 4!

BPI# 8300

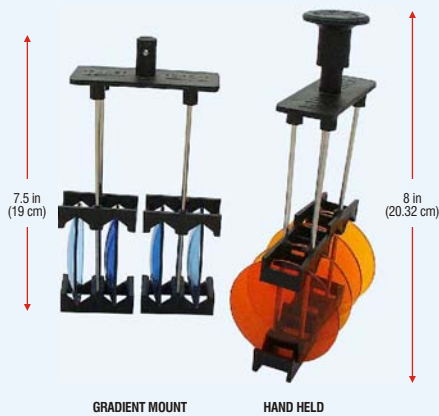

BPI® UV LENS HOLDER II™

The BPI® UV Lens Holder II™ holds two lenses. It is made from stainless steel and heat resistant white plastic. The white color allows the holder to be visibly different. This makes it ideal for UV tinting and other operations that need to be kept isolated from cross-contamination.

STOPS COLOR CONTAMINATION OF UV DYES

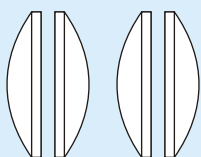

BPI# 9500

BPI® DUAL LENS HOLDER II™

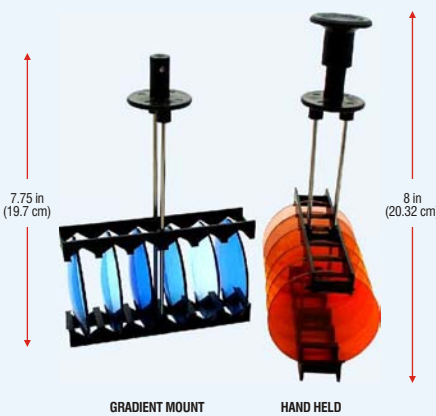

The BPI® Dual Lens Holder II™ holds four lenses. It is made from stainless steel and heat resistant plastic. This lens holder can hold two pairs of different sized lenses.

Also available: BPI® White Dual UV Lens Holder II™ (BPI# 9501). (Similar to UV Lens Holder).

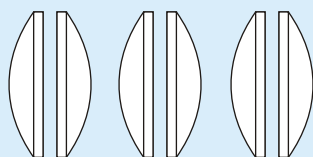

TINT FOUR LENSES SIMULTANEOUSLY
